

SCREEN

AW SUPER TRANS

Transfer Paper for Screen

Product Benefits

- Excellent for 4-Color Process Screening
- Coated Two Sided Release Paper
- Can combine Hot Split Plastisol and Plastisol Puff Inks
- Additional Inks include Puff Overlay; Metallic; Glitter; High Opaque
- Use with Hot Split or Straight Plastisol Inks

Product Applications

Designed for Hot Peel applications for total release of the ink when peeled warm. It can be used with special polyurethane inks. AW Super Trans is NOT recommended for litho printed cold peel transfers. AW Super Trans is a very popular choice for multiple applications.

Product Handling

As with all heat transfer papers, special care should be taken to properly store and handle this grade. Never leave any unused Super Trans paper exposed. Always store the paper in the original cartons and packages and be sure to reseal or cover any unused paper. All heat transfer papers are sensitive to changing atmospheric conditions which could cause shrinkage and registration problems during the production process.

Basis Weight

25" x 38" - 60#
