

SCREEN

AW QUILON PARCHMENT

Transfer Paper for Screen

Product Benefits

- Easy Release Paper
- Somewhat Translucent Parchment Paper
- Use HS Inks for "Hot Spit" or Stright Plastisol Inks for "Cold Peel"
- For One or Two Color Transfers of Drop-Ins

Product Applications

This paper is not dimensionally stable and will shrink inconsistently from sheet to sheet. It is not designed or recommended for multi-colors tight register printing. Always test the paper to determine its stability in conjunction with your equipment and printing methods.

Product Handling

As with all heat transfer papers, special care should be taken to properly store and handle this grade. Never leave any unused Quilon Parchment paper exposed. Always store the paper in the original cartons and packages and be sure to reseal or cover any unused paper. All heat transfer papers are sensitive to changing atmospheric conditions which could cause shrinkage and registration problems during the production process.

Basis Weight

25 x 38 - 50# (lighter basis weights available for slip sheets or overlay)

Stock Sizes

25" x 38"

Packaging

(stock is moisture proof wrapped)

500 sheets per package
