Ultra-Strip 5000

Screen / Plastisol – Hot Peel application

Product Information Bulletin

Product Description:

Ultra-Strip 5000 is dimensionally stable; designed for use with plastisol inks for full release hot peel application; it will also work as a warm peel.

Also suitable for low temp hot peel application which is an advantage for transfer to synthetic textiles

Works well with powdered adhesives.

****Please note: Powder Adhesive is crucial for low temp hot peel application*****

Excellent opacity for white plastisol transfer ink onto black tee-shirts.

Please note: 'Print side' is tinted with a light Blue Tint in the coating.

Product Specifications:

IMPORTANT

We thoroughly test each of our products on various substrates using different transfer equipment. However, it is impossible for us to duplicate all variables using all substrates and transfer equipment. Therefore, it is essential that you test the paper prior to production using your equipment, methods, and substrate material. Heat presses vary in accuracy. Conduct tests to determine the best time and temperature to use with your equipment. Please keep in mind that the Seller's and Manufacturer's maximum obligation shall be to replace any paper that has proven to be defective. Neither the Seller nor the Manufacturer shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.
